

# JOB OPENING:

## Airborne Sensor Operator

Aero-Graphics, Inc., a geospatial services firm, is currently looking for candidates with an interest and qualifications in Aviation/Remote Sensing/GIS/Photography/Geospatial Technology.

### *Key Qualities of an Airborne Sensor Operator:*

#### **Passion for aviation**

-as you will be flying in small planes 6 or more hours a day

#### **Attention to detail**

-as you will monitor onboard complex LiDAR and camera computer systems

#### **Strong work ethic with little need for supervision**

-as you may be on the road 3 weeks at time and potentially troubleshooting camera systems

#### **Team player and a good communicator**

-as you will be working closely with a pilot to complete large, distant projects

#### **Flexible schedule**

-as you may need to pack up and leave town with short notice

This is a wonderful opportunity to gain experience working in the fields of aviation and geomatics.

Potential candidates should send their resume and a cover letter to:
