**Position**
Adventurers and Scientists for Conservation Uinta Field Coordinator

**Location**
Salt Lake City area

**Schedule**
Part-time, seasonal, approx. 10 hours/week, May 15 - October 15

**Compensation**
Negotiable; please include hourly wage requirements along with your application materials.

**About Adventurers and Scientists for Conservation**
Adventurers and Scientists for Conservation (ASC) mobilizes the outdoor community to gather and share scientific data, driving conservation worldwide. We are a dynamic and close-knit team that believes in the transformative power of our work. Our projects range from place-based partnerships that draw outdoor enthusiasts from around the world, to issue-based projects that deploy adventurers-at-large to collect environmental data.

**About the ASC Uinta Project**
The Uinta-Wasatch-Cache National Forest (UWCNF) provides vital wildlife habitat and travel corridors adjacent to one of America’s fastest-growing urban areas. Its 2.1 million acres include a range of habitats including the foothills rising from Salt Lake City suburbs, and rugged alpine basins surrounded by remote Wilderness.

During the summer of 2015, Adventurers and Scientists for Conservation (ASC) is building a corps of adventure scientists to aid the United States Forest Service (USFS) in surveying for specific rare carnivores on the north slope of the Uinta Mountains.

ASC will engage up to 34 volunteers in a camera-based monitoring project to assess the state of wolverine and Canada lynx populations in remote, high-elevation parts of the Wilderness. Through this project, skilled volunteers will set up and maintain baited remote camera stations while working alongside USFS biologists.

**Job Description**
The Field Coordinator assists Bozeman-based ASC staff with on-the-ground operations of our wolverine and lynx monitoring survey on the north slope of the Uinta Mountains. In addition to providing survey volunteers with needed supplies (cameras, batteries, memory cards, bait, scent lure) the Field Coordinator will check camera sites in the event a volunteer team is unavailable. The Field Coordinator will also work closely with Salt Lake-area U.S. Forest Service and other project partners throughout the project.
Responsibilities

- Work closely with Bozeman-based ASC staff and Salt Lake-area USFS staff to ensure successful operation of the Uinta survey.
- Communicate with 15 lead volunteers to schedule camera checks.
- Serve as a safety check-in pre- and post-trip for teams conducting camera checks.
- Assist during two training events June 5-7 and 19-21, as well as during a project wrap-up party on September 26.
- Travel to Evanston, Kamas and Logan USFS offices to pick up and deliver project supplies.
- Contribute photos, video and writing to ASC blog platforms and social media.
- Manage video files from camera checks and ensure data is backed up to hard drives.
- Assist in review of video files for presence/absence of target species.
- Help with other duties on other projects as required.

To apply for this position, please submit a cover letter, resume and three references to ASC Program Director Mike Kautz via email at mike@adventureandscience.org.

Deadline for applications is April 22, 2015.
