

Geography Colloquium

Student Thesis Proposals

Hannah Peterson

“Assessing Plot Scale Variation in Snow Depth and SWE at Very High Resolution using Structure from Motion”

Matthew Olson

“Assessing net shortwave energy and albedo on glaciers in High-mountain Asia through remote sensing”

Jordin Hartley

" Investigating disturbance patterns and effects on vegetation regeneration for a high elevation whitebark pine site in the northern Rocky Mountains"

Friday, August 23rd

10:00am-11:00am

GC 5490

Join us for coffee/refreshments at 9:30am
