This course helps you understand how GIS and spatial methods could be utilized to analyze and solve topics in public health, epidemiology, and environmental health. It will use real-world applications such as environmental exposure and mobile health to highlight principles, methods, and techniques of Medical/Health Geography.

Semester: Fall 2015
Time: Tuesday
4:35pm-7:35pm
Location: OSH 215

Instructor: Neng Wan
Assistant Professor
Department of Geography
University of Utah
