

CLIMATE MANAGEMENT ISSUES

Offered: Spring 2015

Course #: 3963-002 / 5963-002

Credit Hours: 3.0

Days: Wednesdays 4:35pm-7:35pm

Introducing the new course in the Geography Department's Climate Change Certificate and for anyone interested in understanding this critical issue!

- Climate change mitigation also involves how we think, act, do business, and spend personal time.
- This course looks at all these interrelationships and links them to the rest of the scientific picture.
- Change is of the essence, and managing these components is critical in order to make effective long-term changes.
- This course emphasizes practical involvement and problem-solving skills.
- It will enable you to develop a sense of empowerment and functionality in the current job market through understanding and being able to respond to current employer expectations.

- **Prerequisites: GEOG 3210/5210 and GEOG 3215/5215**
